

Statement

Arctic Paper and EU Deforestation Regulation

Arctic Paper is actively preparing for the application of the EU Deforestation Regulation (EUDR), Regulation (EU) 2023/1115, as amended. The Regulation will apply to Arctic Paper from 30 December 2026.

Arctic Paper sources wood based raw materials for use in production. Together with our relevant suppliers, we are aligning the required information, documentation and supply-chain processes with the applicable EUDR requirements.

With regard to products manufactured from relevant wood based raw materials that have already been covered by a Due Diligence Statement (DDS) or, where applicable, a simplified declaration, Arctic Paper will act as a downstream operator within the meaning of the EUDR.

Under the current EUDR requirements applicable to downstream operators, Arctic Paper is not required to submit a new DDS for such products or to provide DDS reference numbers to its customers.

Arctic Paper will collect and retain the information required under the EUDR, including DDS reference numbers where applicable.

Depending on the relevant product and the applicable sourcing and import arrangements, the relevant Arctic Paper legal entity may act as an operator or as a downstream operator within the meaning of the EUDR. The applicable EUDR obligations will be determined accordingly.

Arctic Paper continues to review and adapt its procedures, systems and controls in line with the applicable EUDR requirements.

The Arctic Paper mills — Arctic Paper Grycksbo AB and Arctic Paper Munkedals AB in Sweden, and Arctic Paper Kostrzyn S.A. in Poland — hold FSC® Chain of Custody and PEFC Chain of Custody certifications.
